Remarks:

The Declaration of Commercial Success (re-attached for convenience) submitted along

with the response filed on August 25, 2008 referred to Tabs A and B, which are attached to this

submission. Tab A includes to articles that describe the success that surgeons are having with

the claimed invention. Tab B includes declarations from surgeons who have successfully used

the invention claimed in this application, which are also attached. These declarations are

further evidence of the commercial success and the long-felt need that the invention has solved

for craniofacial surgeons. The declarations specifically refer to the claim language, and thus

provide the required nexus between the commercial success evidence presented and the

claimed invention.

Because it is well-settled that evidence of secondary considerations must always be

considered en route to a determination of obviousness, see e.g., Stratoflex, Inc. v. Aeroquip

Corp., 713 F.2d 1530, 1538 (Fed. Cir. 1983), Applicant respectfully requests that the Examiner

consider the attached materials and issue a patent containing the pending claims in due course.

If there remain any additional issues to be addressed, the Examiner is invited to contact the

undersigned.

Respectfully submitted,

/Kristin M. Crall 46,895/
